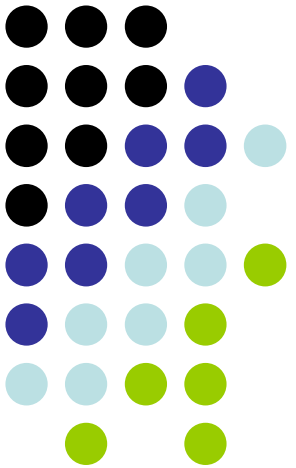
10th Annual Enterprise Architecture Conference

ENTERPRISE ARCHITECTURE

Central UK Government: *Justice Sector*

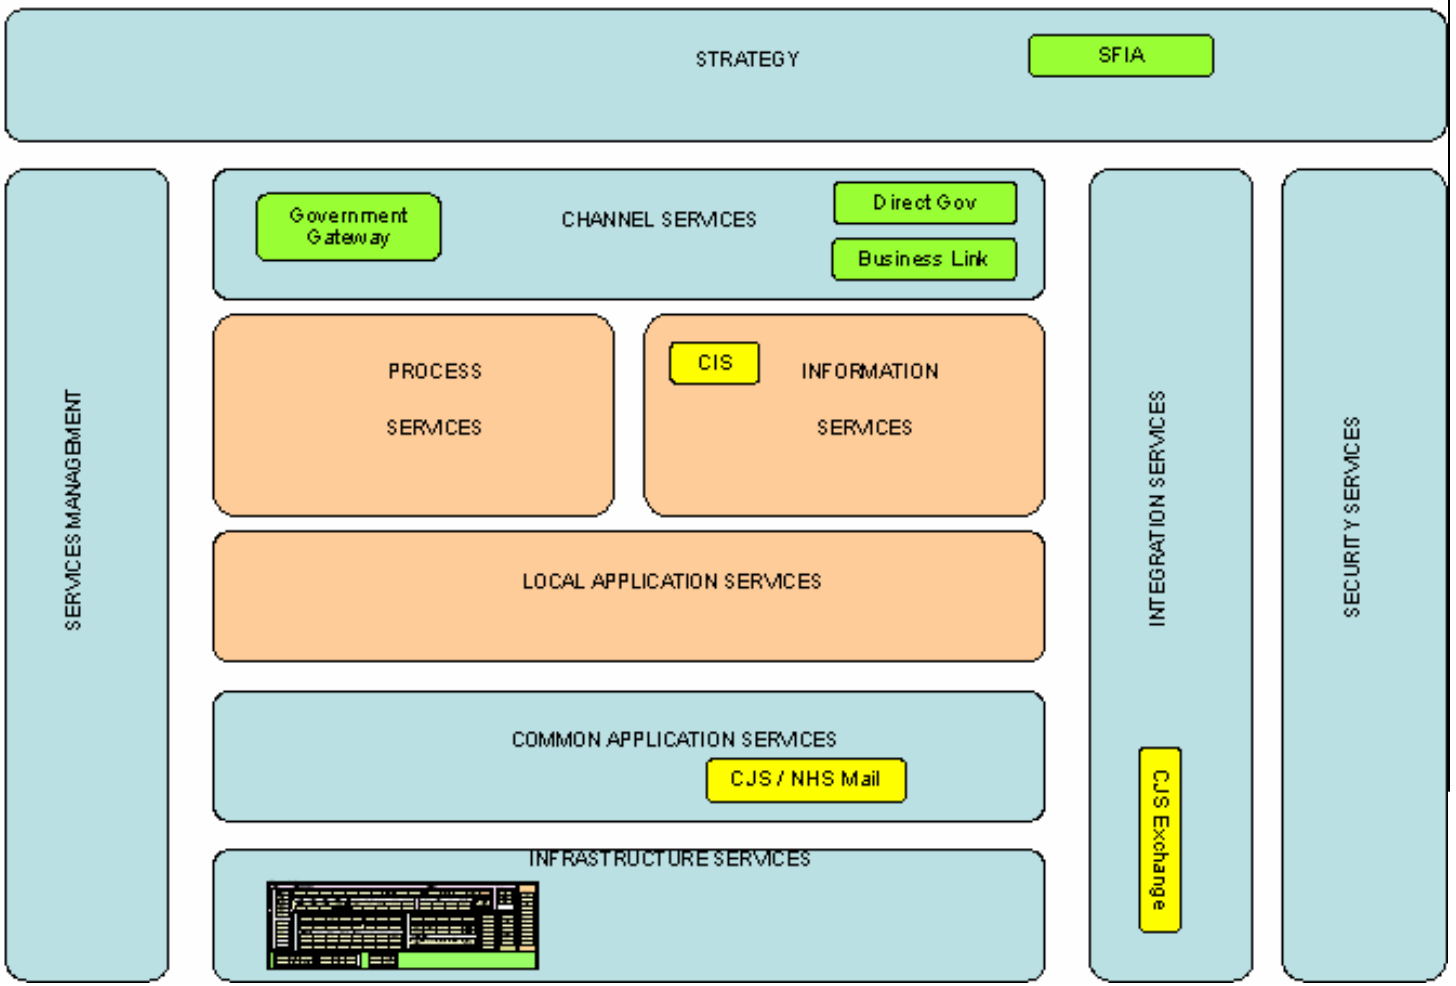
Enterprise Architecture progress:

- Department for Constitutional Affairs (DCA)
  - Successful business case developed
  - First cut EA delivered in 10 weeks with immediate business benefit returns
  - Most effort in Business and Applications layers
  - Rapid EA Framework aligned to TOGAF
  - EA Tool Selection & Procurement
  - Roadmaps developed for HMCS – 5 year vision
- CJIT (Criminal Justice IT)
  - EA Business Case Developed & Promoted
  - Strategic partners to the DCA



ENTERPRISE ARCHITECTURE

HMG EA Reference Model



The Value of a xGEA

The business-led vision that underpins the Transformational Government agenda requires an improved method of identifying opportunities:

- To **reuse** solutions developed for specific issues but which potentially could have a wider value
- To **share** across public sector organisation boundaries to work more efficiently and save resources
- To be informed of the **wider context** (other public sector bodies, business and the citizen) in which IT enabled business change is taking place

By effectively providing a business and IT blueprint for government, the xGEA will help to deliver these requirements. Other benefits include:

- Promoting the development of common infrastructure
- Improved management of risk
- Identifying and aggregating demand to promote efficient use of resources
- Sustainable alignment of business and IT functions
- Agreement of shared standards to promote better inter-working between agencies
- A greater competition in the supply of IT services and products
- Improved business agility and a reduction of total cost of ownership

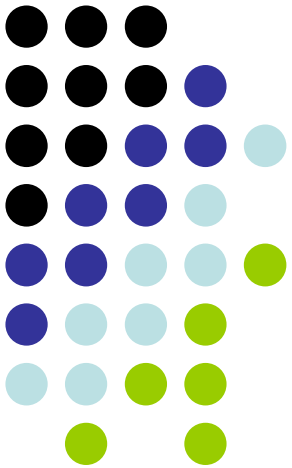
- Messages / Operations
- Interaction Diagrams

- Applications
- UI
- Application Server
- Database
- Interfaces, Integration Server & Middleware

- Physical Servers
- Disks
- Workstations
- Network & Firewall



ENTERPRISE ARCHITECTURE

Architecture Evolution & Management

The architecture lifecycle in an ongoing process that forms the core of architecture work, to meet the business and information technology needs. The process is based on a dialogue and interaction with the business users to ensure business alignment.
