Open Group Trusted Technology Forum Roundtable Discussion and Lunch

May 10th Central Hall, Westminster, London – By Invitation Only

A select group of cybersecurity leaders from government and supplier and commercial organizations will convene for a complimentary lunchtime briefing and panel discussion with subject matter experts on global supply chain and security challenges at [The Open Group Conference in London](#) on May 10th.

The topic of the Roundtable discussion is a key cybersecurity and global supply chain issue: how to maintain trust—*effectively and efficiently*—in the integrity of technology providers and the commercial technologies upon which much of society’s critical infrastructure depends. Sometimes also referred to as “product assurance,” this issue has moved up on governments’ agendas in response to changes in the global supply chain and security landscapes. The Open Group’s Trusted Technology Forum (OTTF) is addressing these issues through the creation of best practices and an accreditation program to identify trusted technology providers around the globe.

The Event will run from 11:30 – 2:00 on Tuesday May 10th.
