Core competencies for EA development

Reva Modi

Today's Focus : People in EA

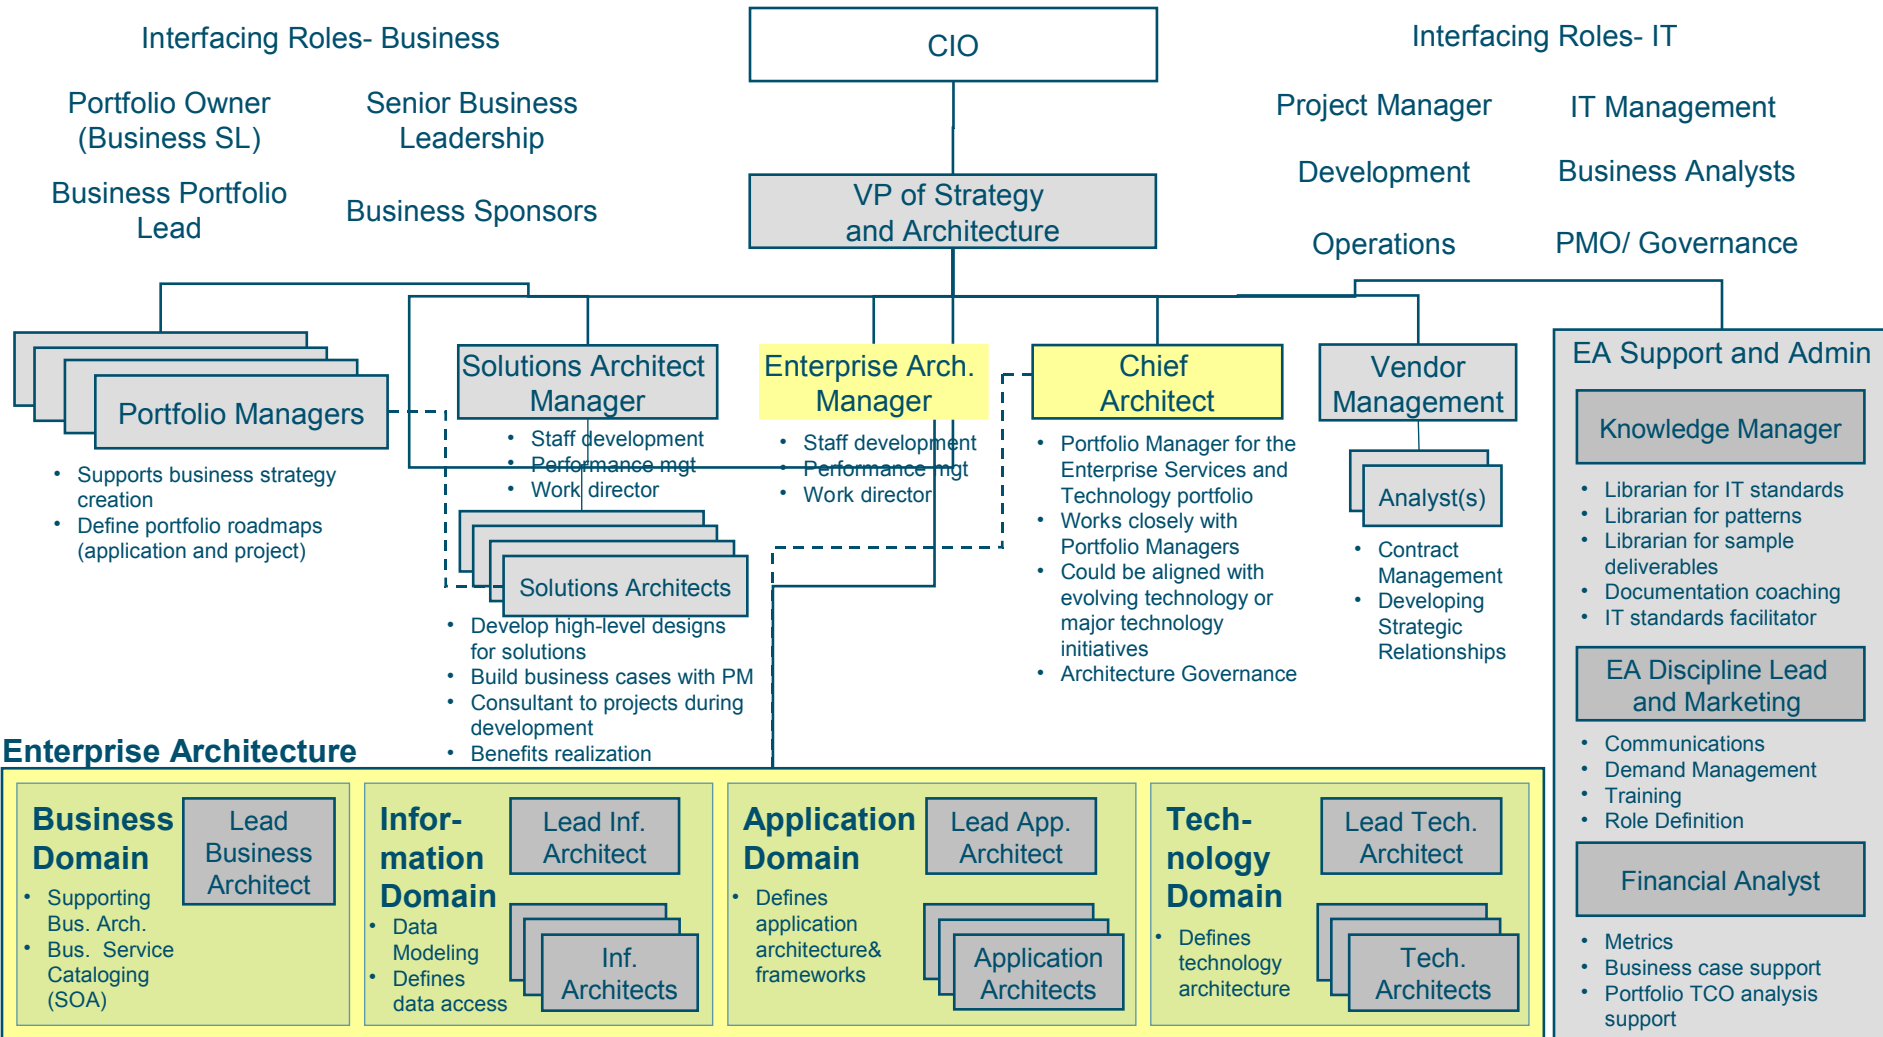

- **Organization structure:** defines how the business is structured and organized
- **Competency:** defines **knowledge, skills, and attributes** that an organization's workforce must possess to perform a business capability, to execute the organization's strategy, and to ensure that the organization competes successfully in the marketplace.
- **Culture:** defines values, norms, and behaviors

Organization Chart

Sample comprehensive organization that we have implemented at clients. This model shows the reporting structure of a centralized Enterprise Architecture organization.

It's about the Architect...
