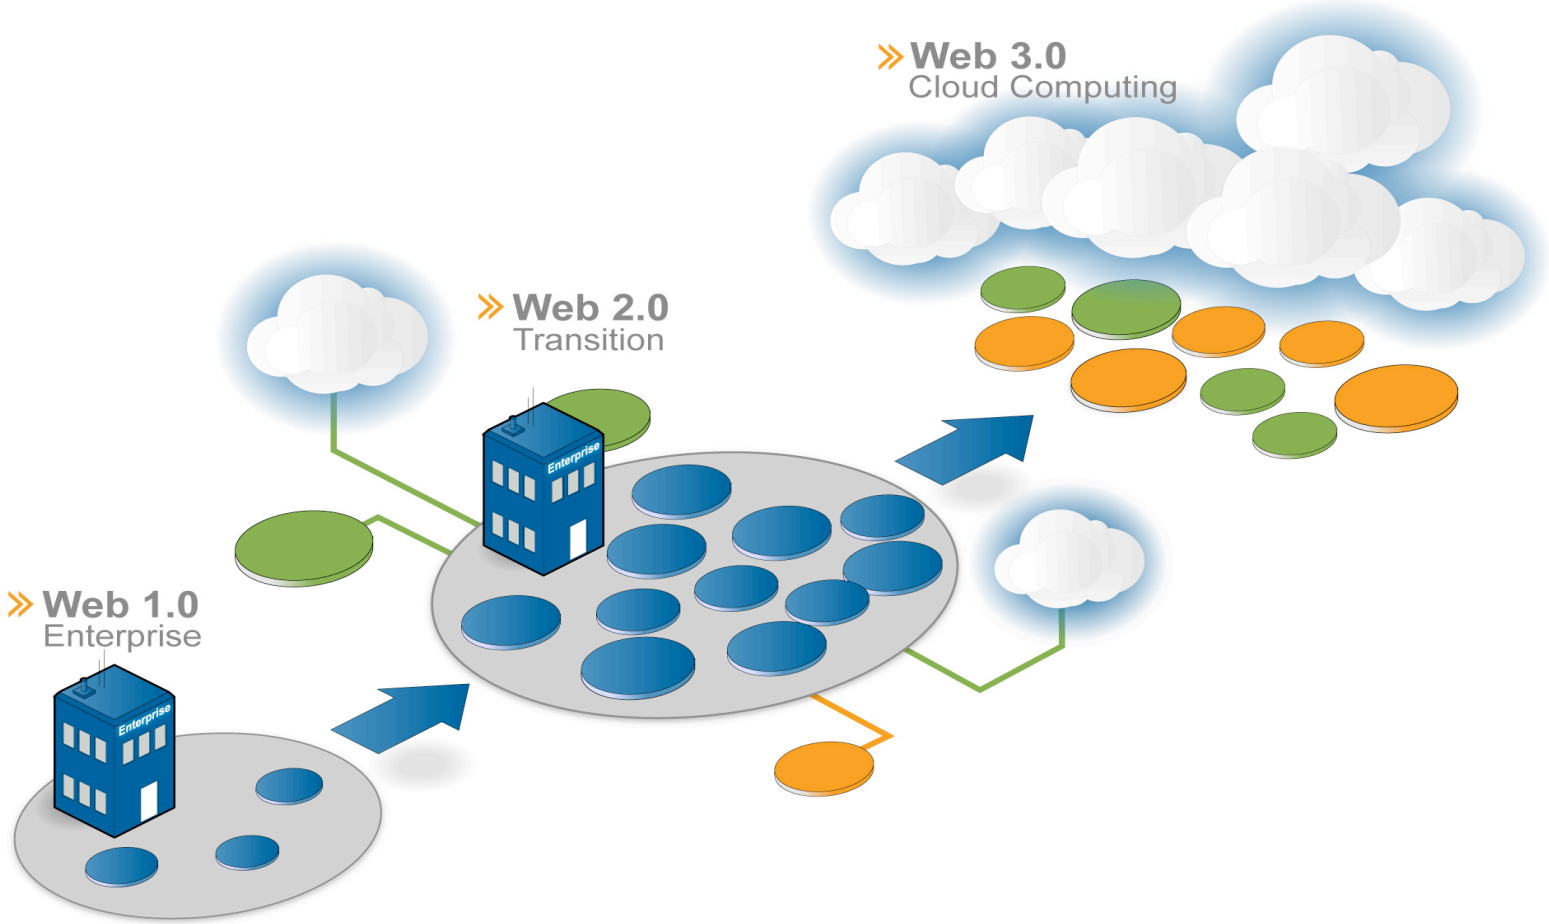
Topics

- What do we mean by “Cloud” and “Identity”?
- What are new challenges does cloud computing introduce to Identity Management?
- How can Identity Managment functionality be delivered as a service?

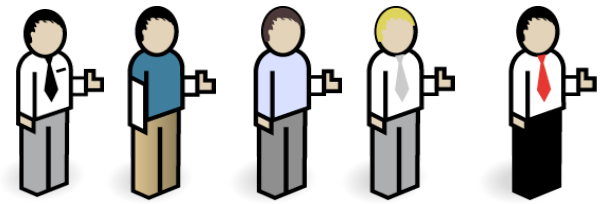
Evolution of the Cloud



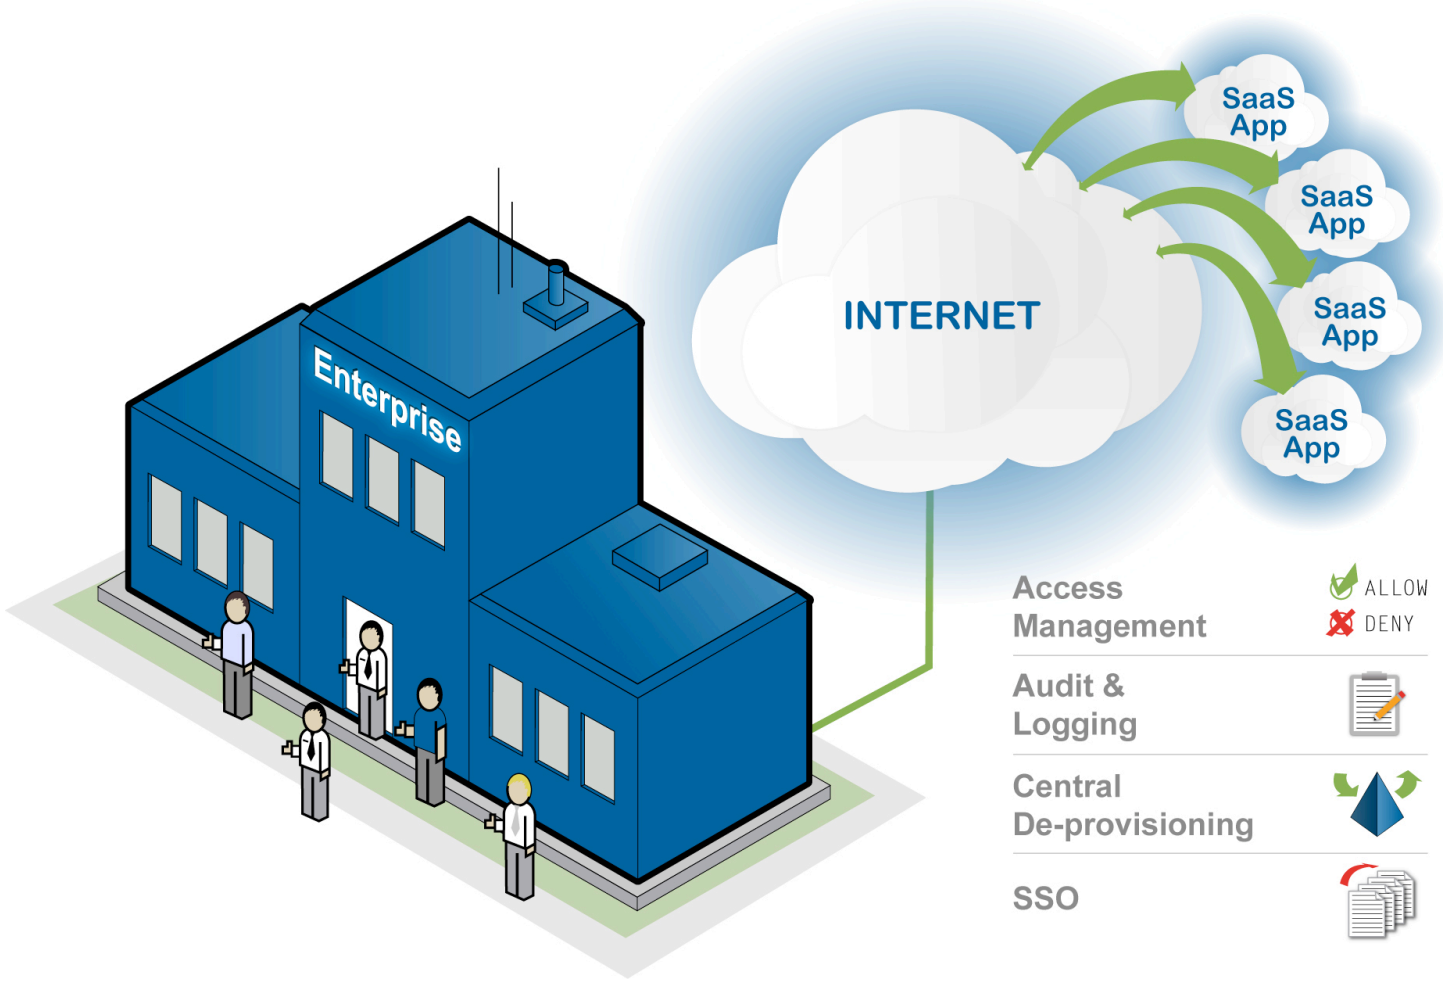
3 Types of Identities: Employees, Business Partners and Consumers

Same concerns, but *criticality varies*:

Size of Population, End-user Experience, Authentication Types, Compliance, Privacy, Legal

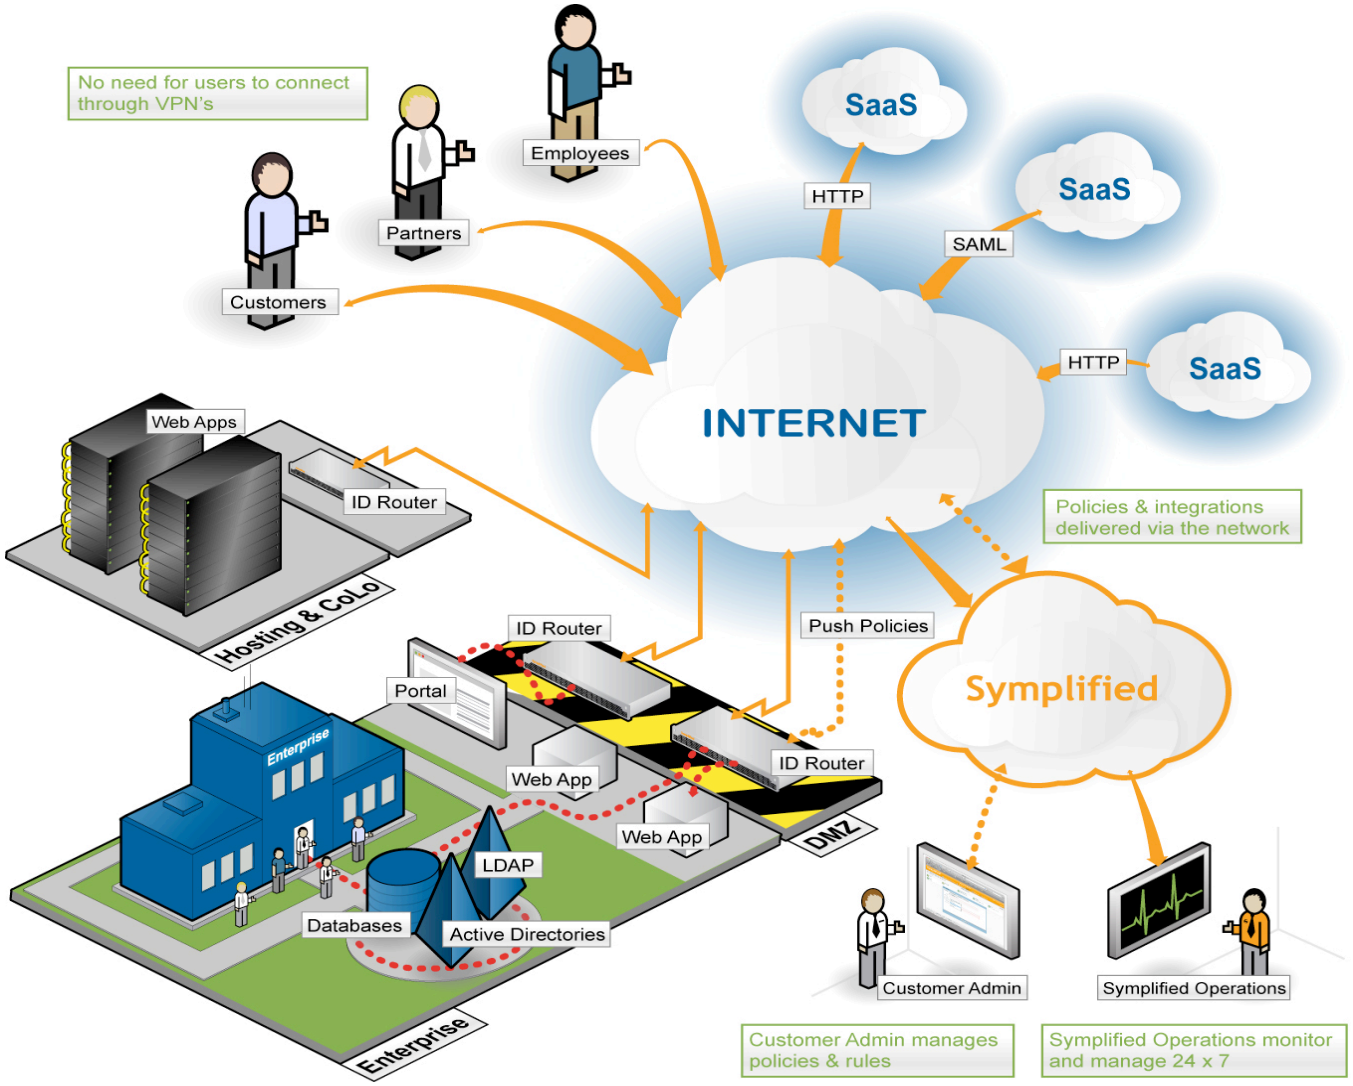


Challenges in Cloud Identity



Role of a Trust Broker

Identity Management as a Service



Thank you!
