

# Joining up delivery to Service Personnel and Veterans

John McNaughton (Salamander)

Phil Marks (SPVA Strategy)

# Is Service Personnel Administration different ?

- Tempting to see standard HR solutions as the answers
- Not (internally) popular view and (we consider) not accurate,
  - Highly politicised
  - Highly diverse
  - Large legislative load (esp historical)
  - “HR to a foxhole”
  - Knowing where the people are day to day, and their position and competence

# The Current challenge is...

- Legacy systems, legislation (and thinking)
- Large Scale admin system rollout is a success, but still with major challenges
- *Broadening and Deepening* the capability
- Changing the mindset from process to outcome (where outcome is in the experience of the end user)

# Our Joint Approach

- Remember the exploitation, not the purity of approach
- Use the enablers (MoDAF, RIVA, Existing Governance, current operating model)
- Focus on decisions,
- Shared understanding and one version of the truth
- EA is something you do & learning is a vital part of it.

# Seeing Architecture as the Means to the ends

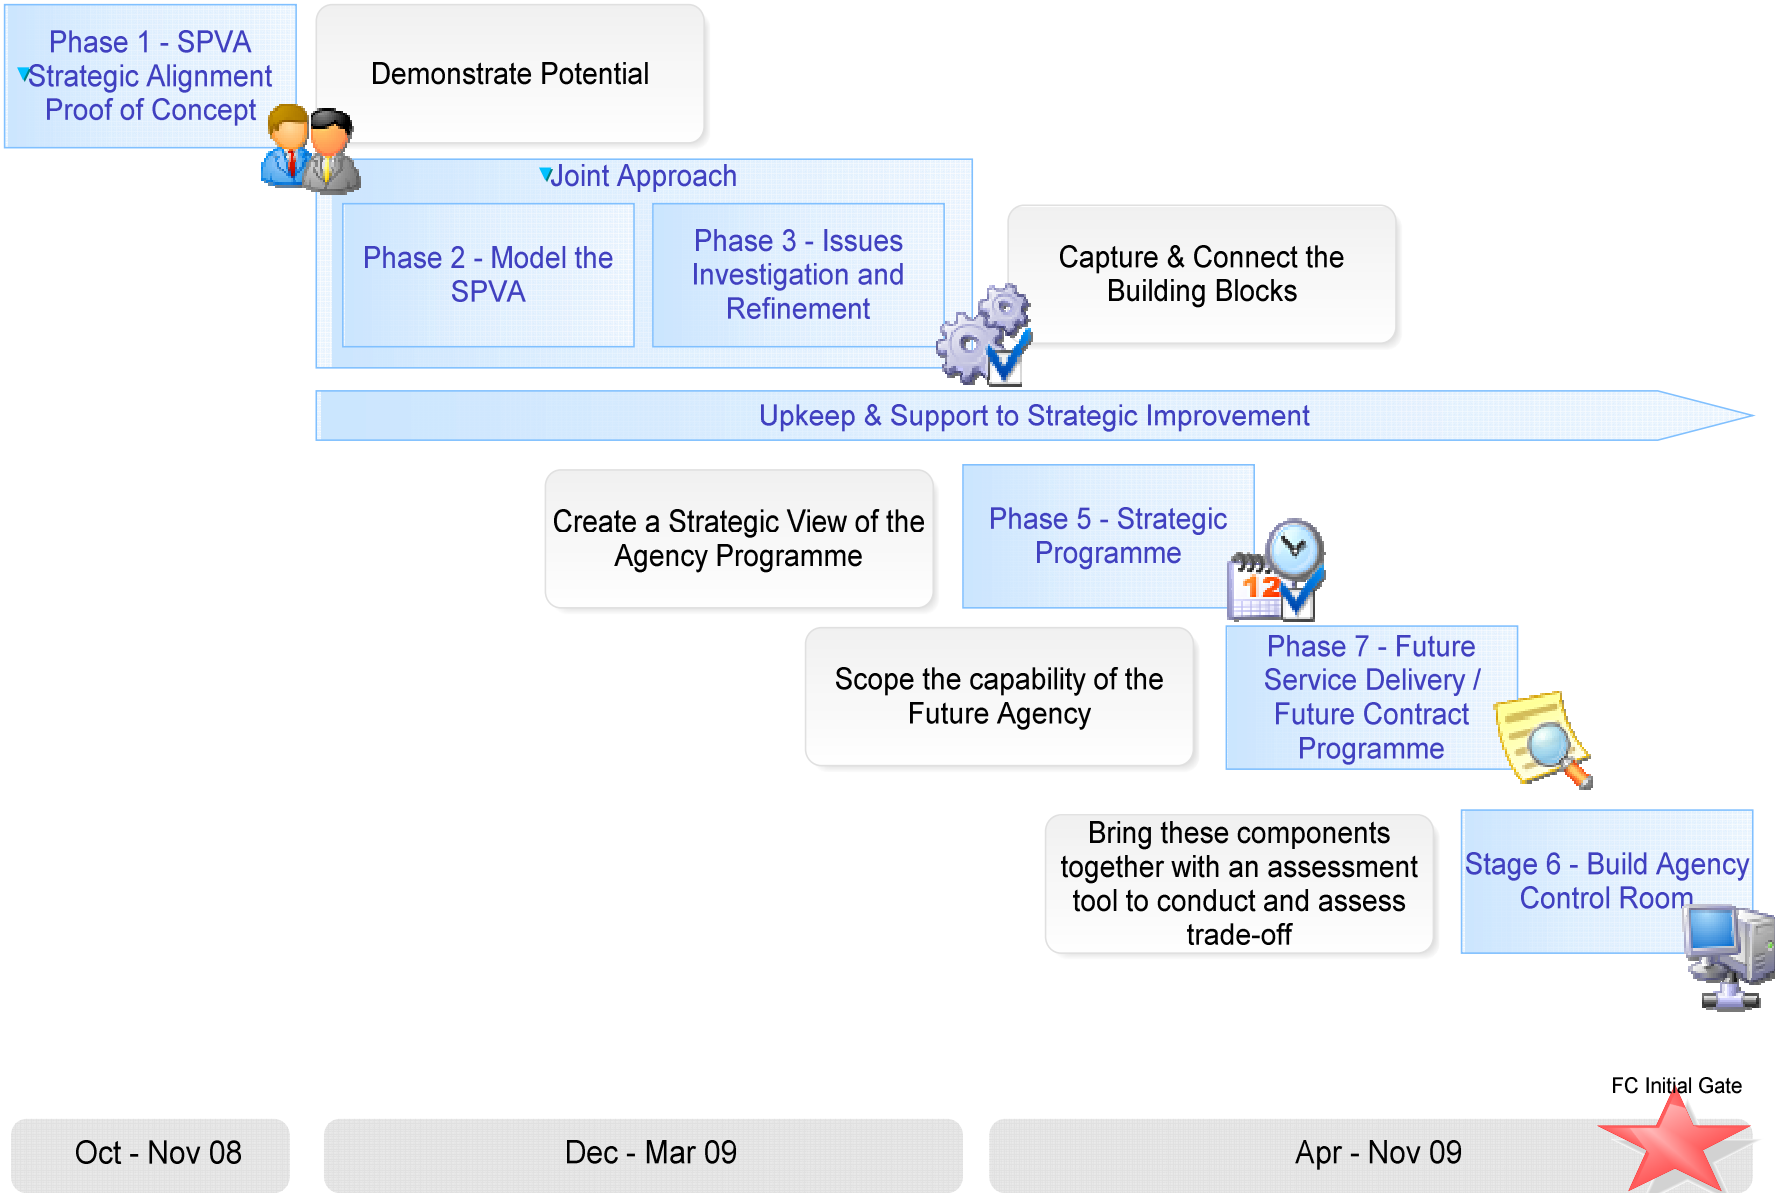

- It's about solving complex problems that involve intricate collections of things and that have real sophistication, like;
  - de-risking large and costly programmes
  - planning / running an operational campaigns
  - balancing a portfolios of systems and processes
  - creating common understanding around major business change
- It is not a game of “who has the cleverest architecture” but is about exploitation of appropriate methods to deliver sound decisions.

# Understanding the needs

- Proof of Concept to understand the required information
- Time boxed but important area
- Brought the architecture to life
- Opened up some areas and closed others

# EMT Wider Programme

# Together we are...

- applying architecture methods to real problems that deliver benefit; creating pull from the business not push from the architects,
- talking the language of the business, not the system,
- inspiring an approach that scales, connects and grows the enterprise.

**Strategic Intent - What we strive to do**

*Dynamic delivery of high quality, comprehensive and responsive through-life personnel services to the serving and veterans' communities*

# Service Personnel & Veterans Agency

An Executive Agency of the Ministry of Defence

**Mission - What we must do**

*Deliver reliable, trusted and efficient personnel services to the serving and veterans' communities  
Underpinned by the following key principles:*

- Customer Focus - understanding and responding to their needs;
- Efficiency - cohesion, coherence and optimal use of technology;
- Business Excellence - continually seeking improvement;
- Employer of Choice - well trained, valued and fully engaged staff.

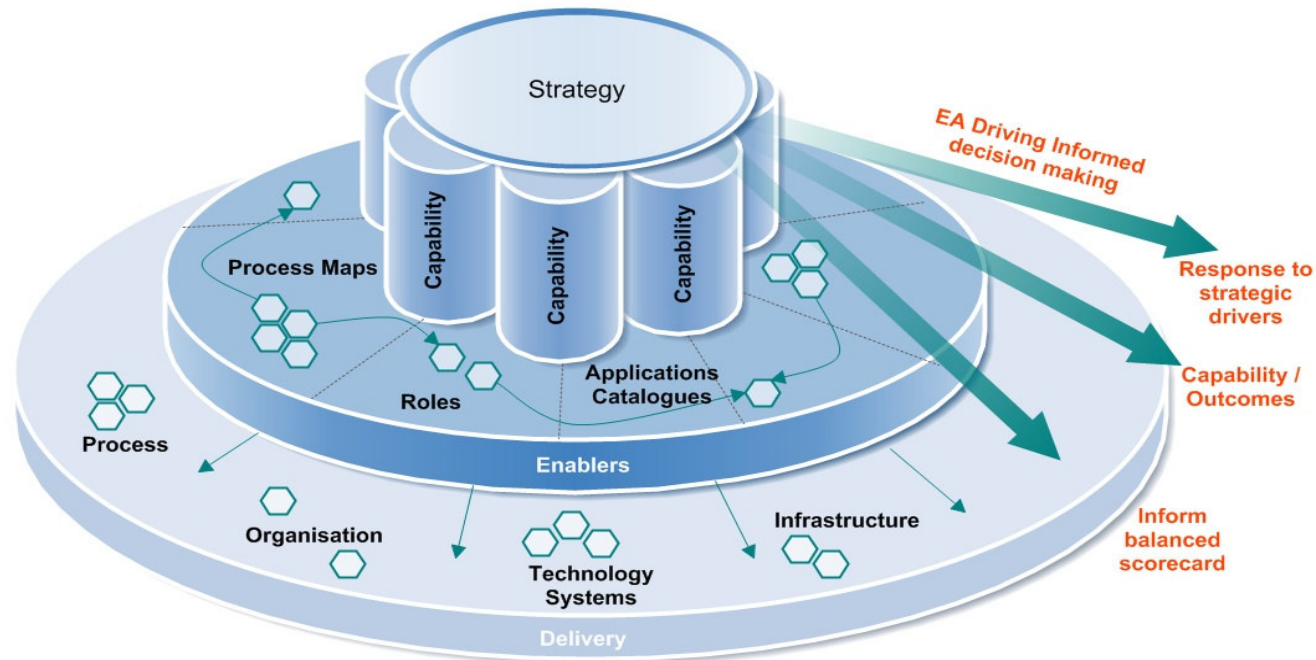

# So what does it look like and where are we going...

## SPVA Enterprise Management - Building Blocks

The Strategy is informed by the organisation, process and technology. The Enterprise Architecture helps to capture, define and exploit knowledge around the development of the Strategy and it's key enablers to drive the response.

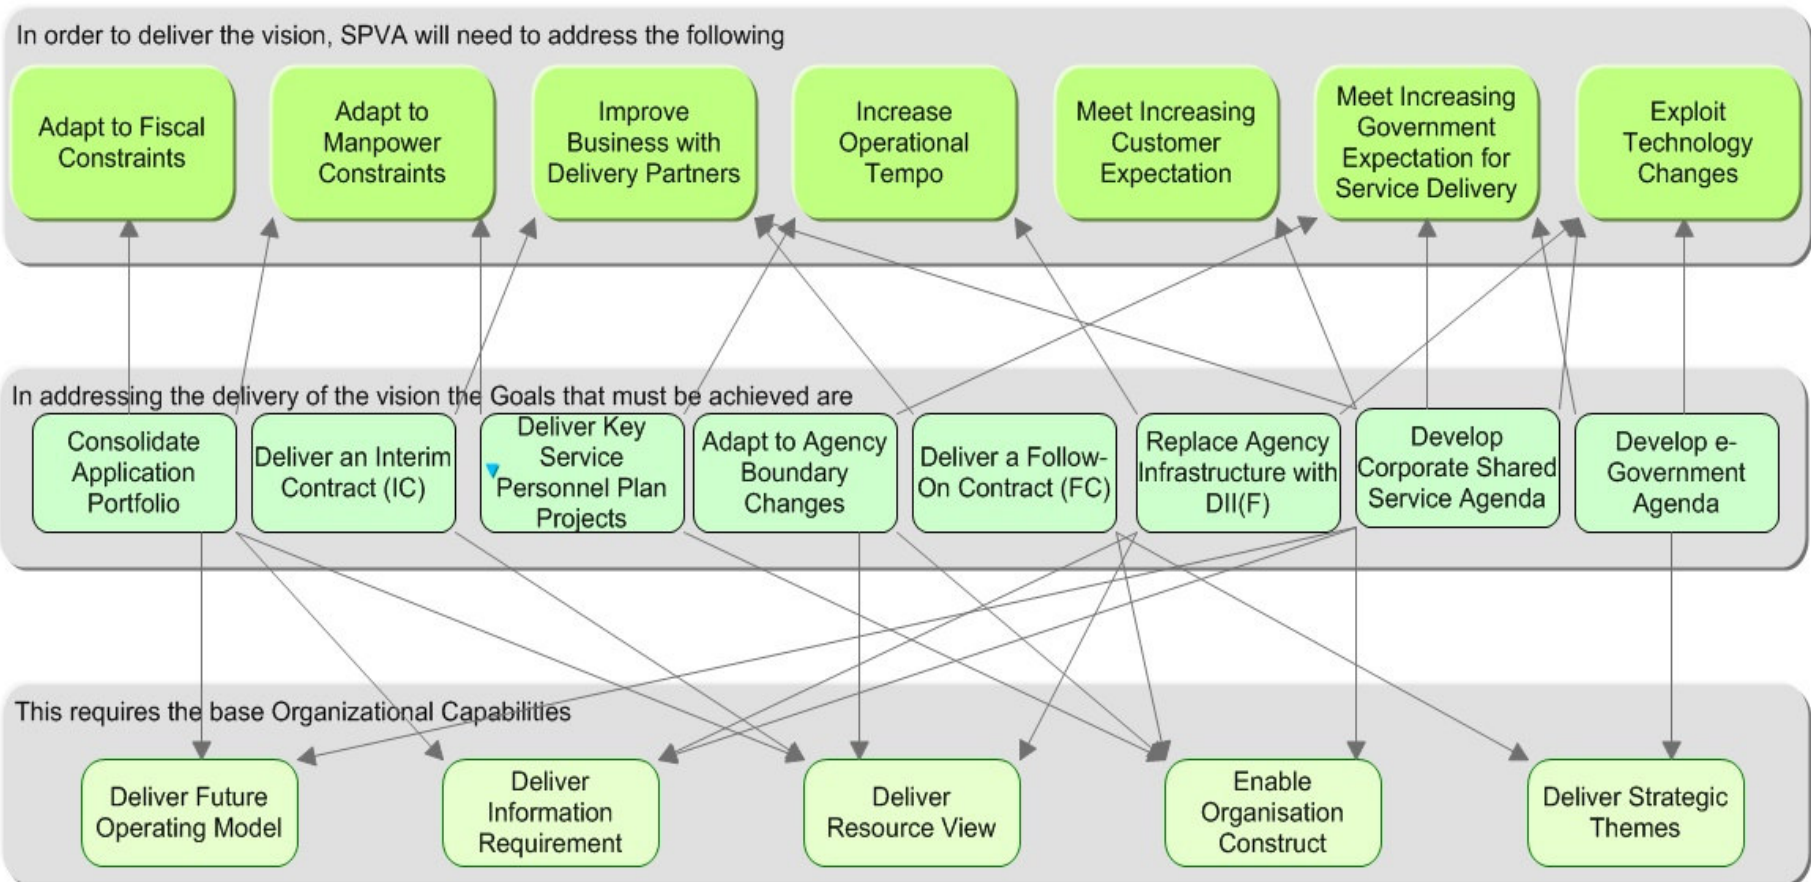

Created: 01/10/2008

Modified: 23/03/2009

Owner: PM

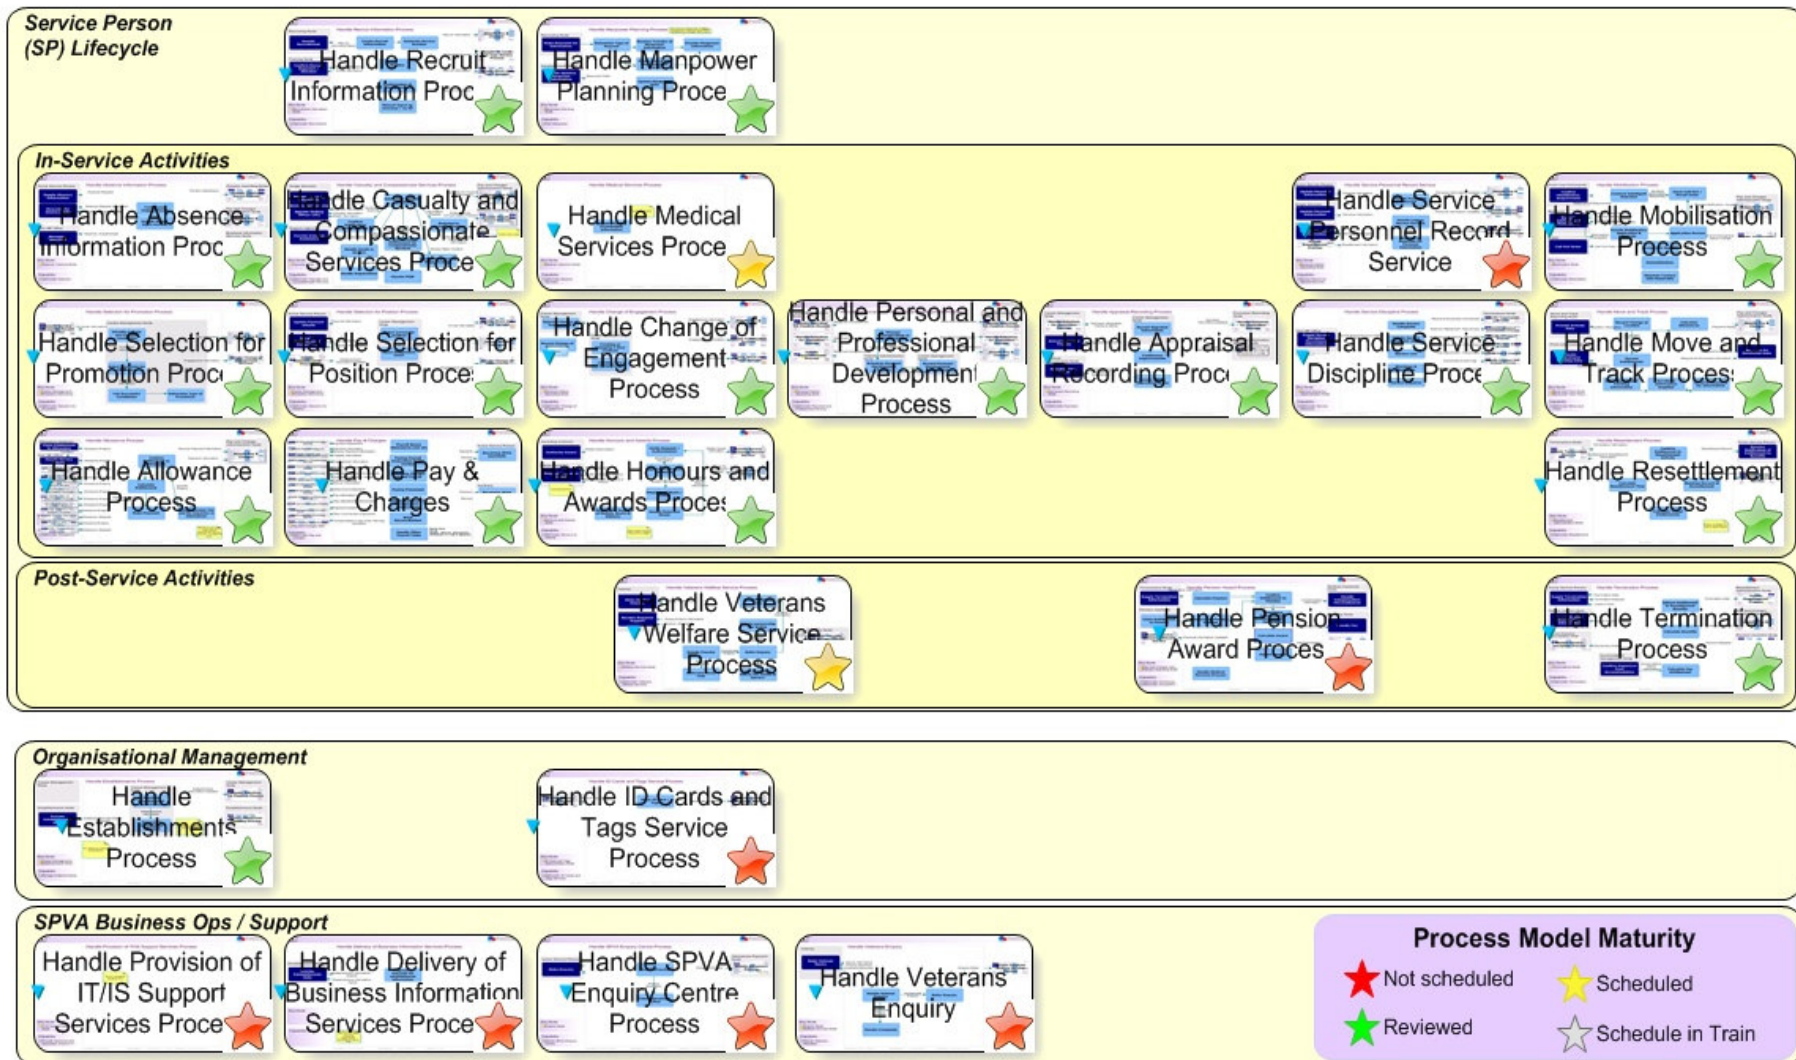

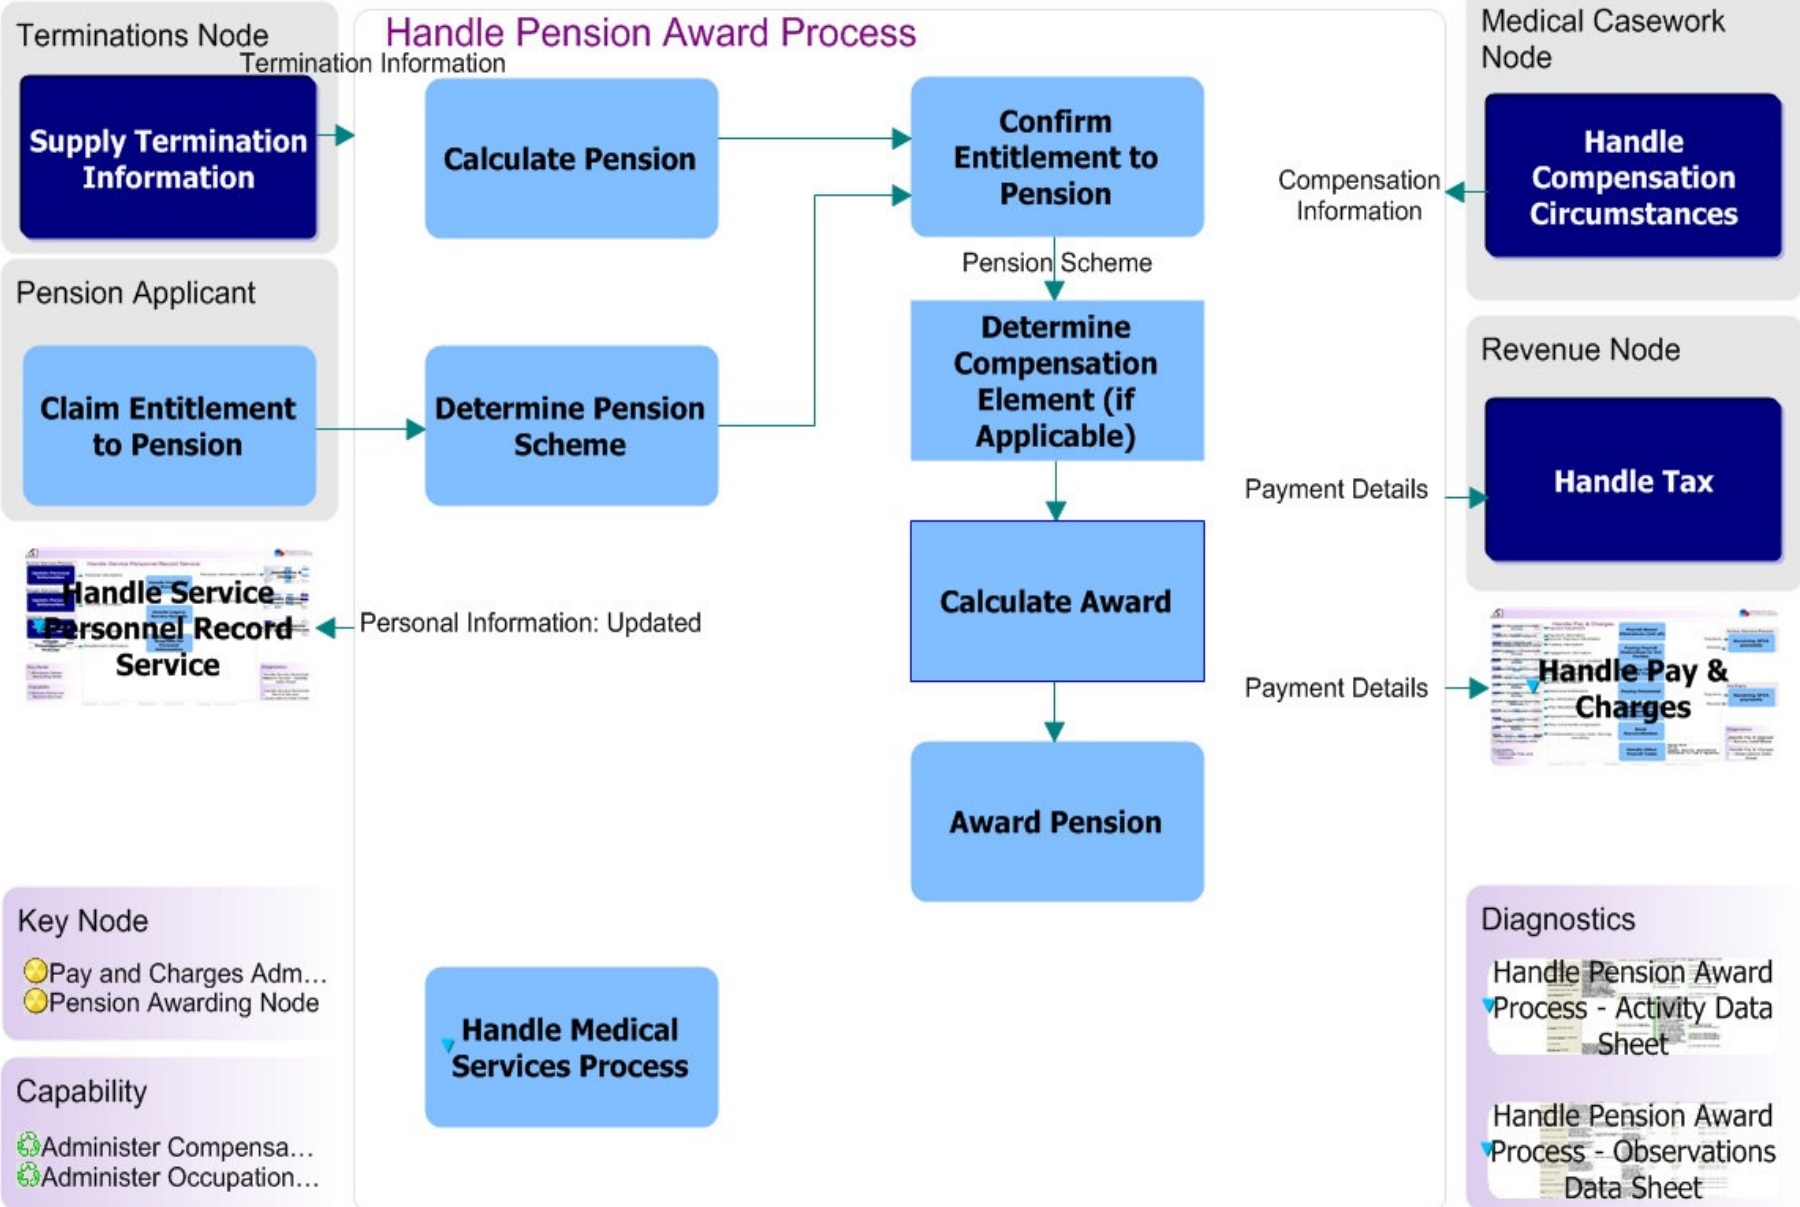

Enterprise Planning is to deliver a single strategic direction to be effectively spread and understood across the whole Agency. This is considered to be an enabler for effective performance management.

This graphic shows the high level (and logical rather than actual) processes used to deliver the Agency Capability to the service person through life, the key here is how the various parts of the agency depend on one another as well as with other agencies. Currently not all processes have been modelled and reviewed. As the Strategy team develop their articulation of the processes this graphic will be further developed.

# Pensions Configuration (Current)

Note that this pattern is repeated with HKSRA (5), PIVS (39), Excalibur (81), HKMSCP (29), MSPS (39), and is not shown here.

Note PIVS Handles Special Cases.

**Supporting Information**

**Capability**  
 Administer Occupational Pension Services

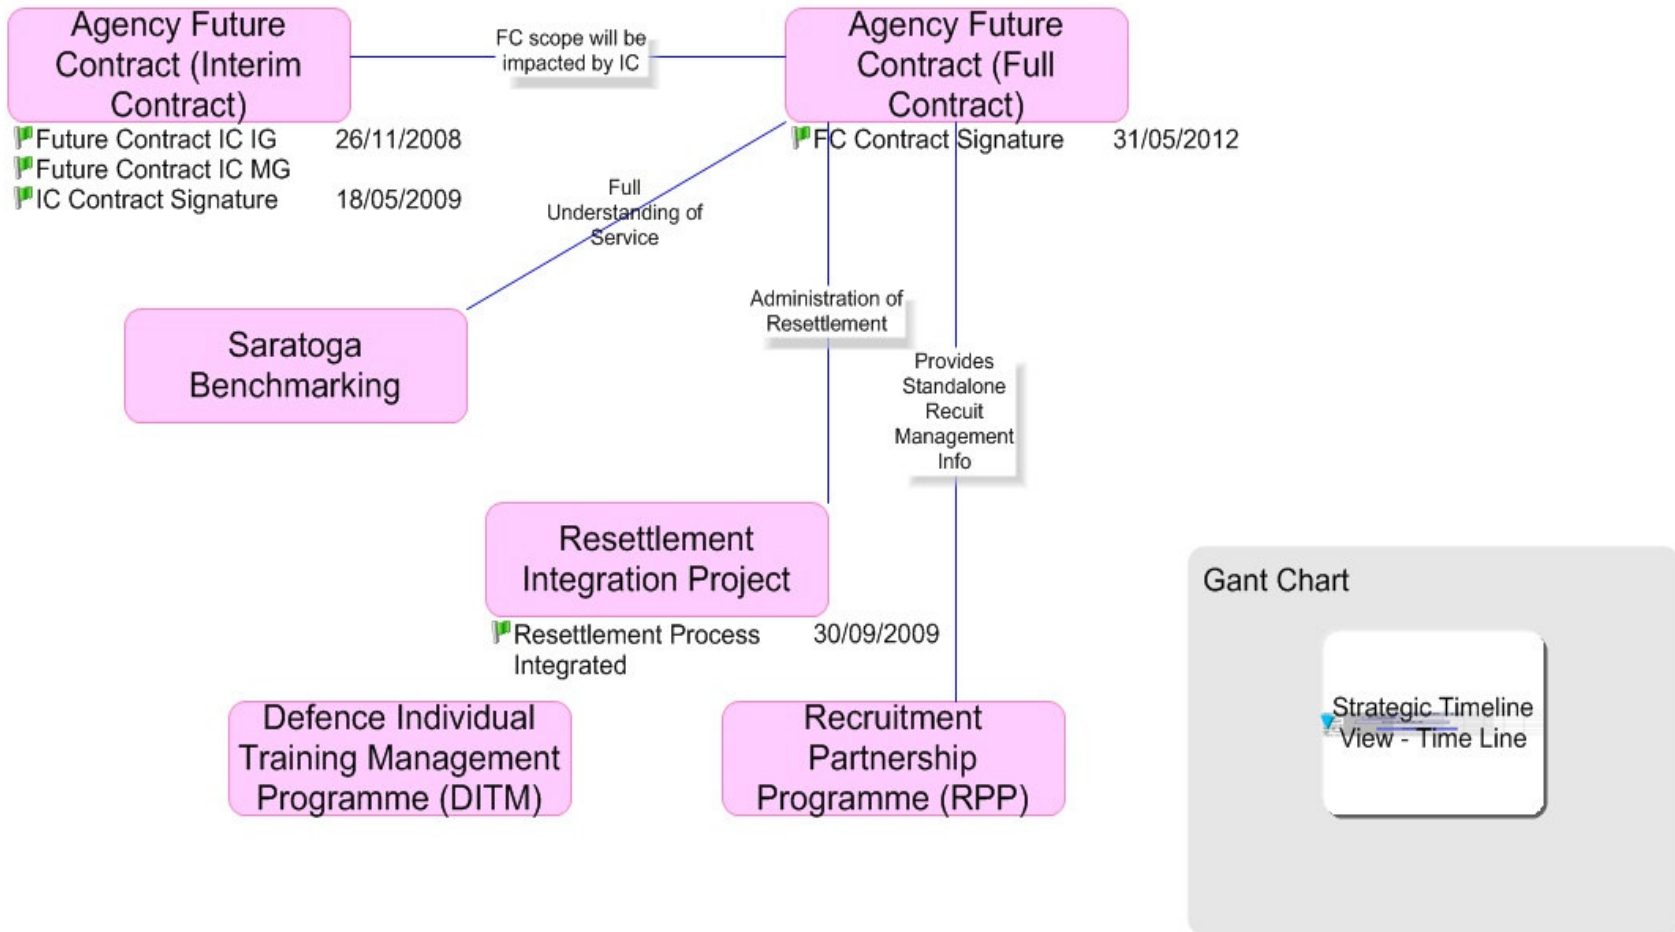

**End User**  
 Service Person  
 Veteran

**SPVA Owner**  
 AD Pensions B2

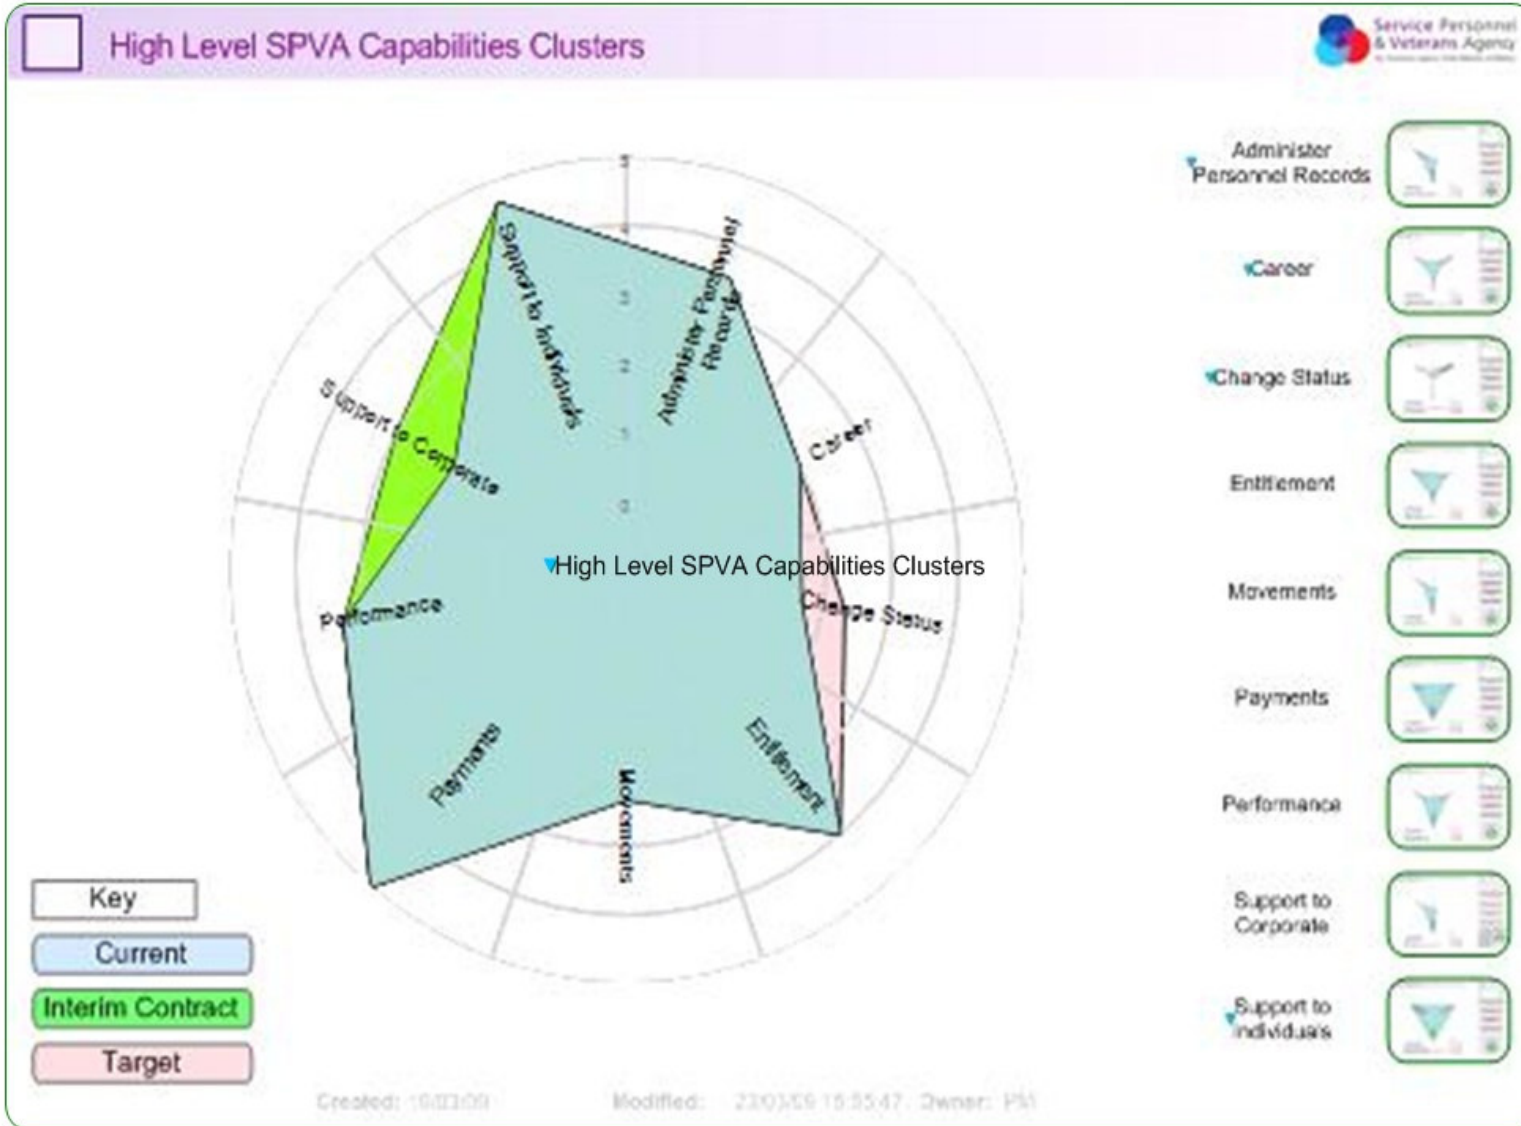

**Issues**  
 Duplication of Payment Mechanisms

**Diagnostics**  
 Pensions Roadmap

Milestones represent significant events or dates in a schedule, such as the date the building phase of a project is complete and can highlight dates when evaluate of the various projects is required. This view allows connection across the Agency of the inter dependencies between differing projects linked to time, the projects are represented logically and the timeline view is also available.

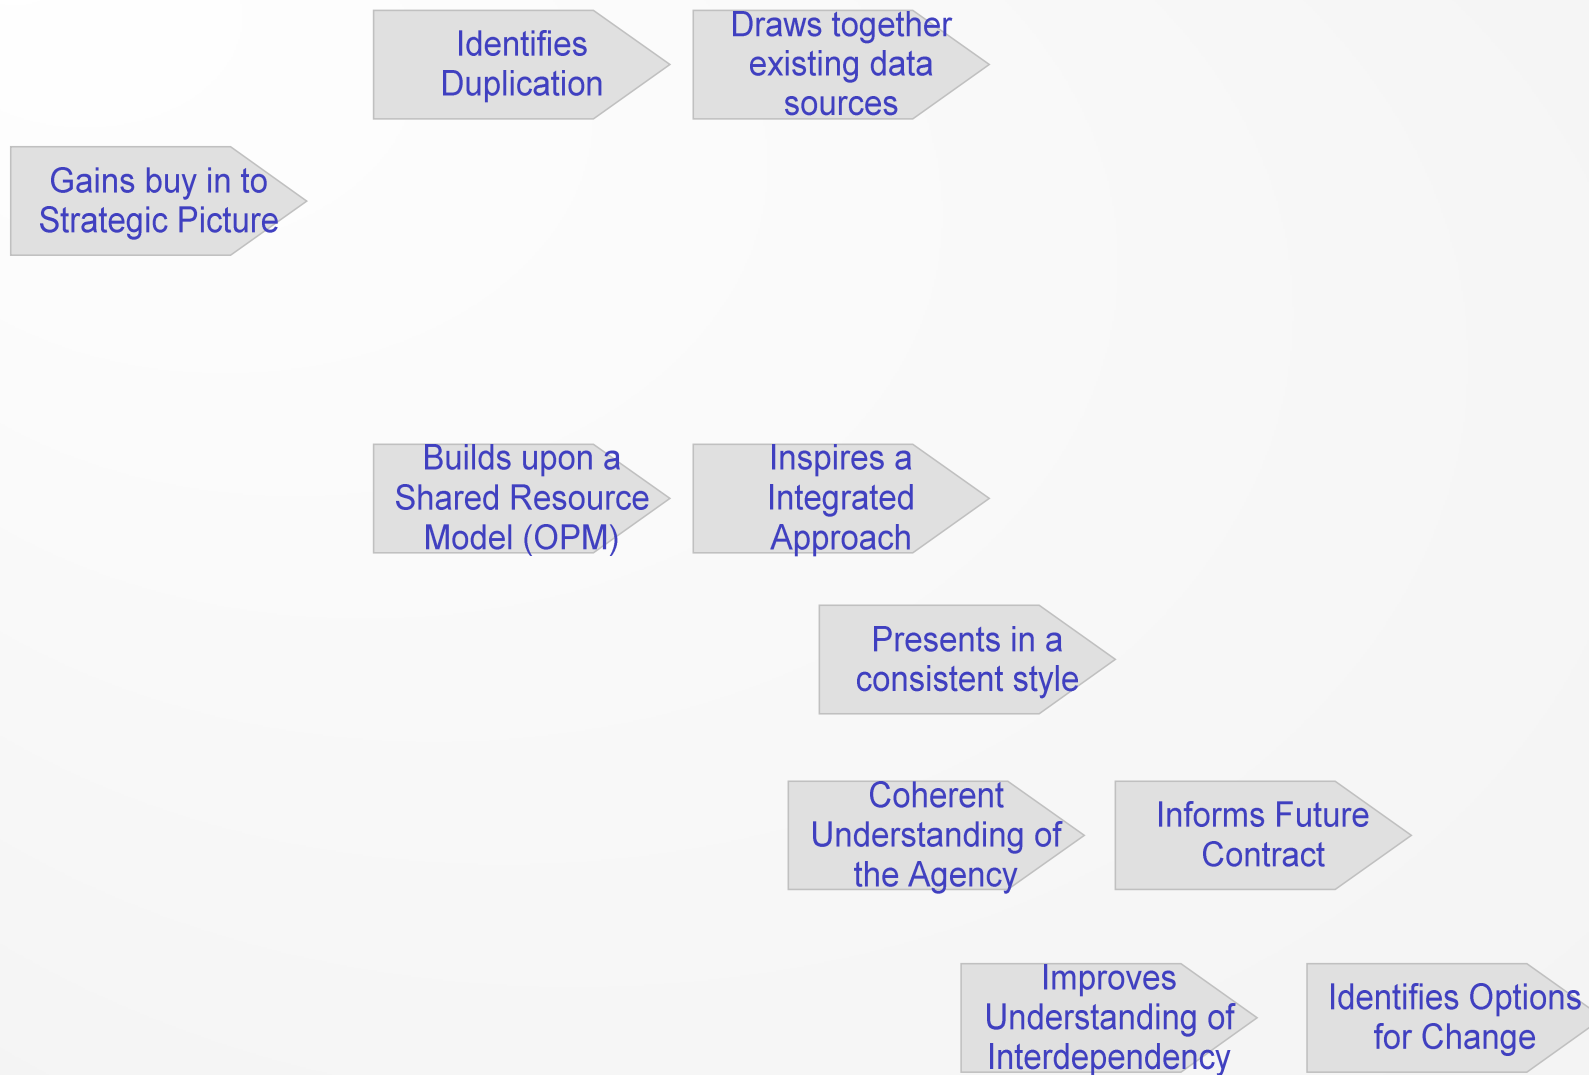

## EMT Wider Programme (showing Benefits at point of Maximum Realisation)

# Distributing the Architecture

- The architecture is available to the team to work collaboratively
- The repository is selectively published
- Wider engagement ongoing
- Aim to have fully dynamic web based architecture model to confirm ownership

# Summary

- We have many of the building blocks
- It is getting easier to build “the right views” to support shared understanding
- The underlying data is proving highly valuable on re-use
- The approach has credibility
- **The decision making is better informed and more accurate**
- We still have a long way to go
