Background

- ❑ Interoperability is an issue for most organizations
 - However interoperability is a big issue
 - Interoperability has many meanings
- ❑ Therefore we need to understand what is really meant by this requirement
 - Use business scenarios
- ❑ The following is our understanding of the interoperability requirement

What Is Meant by Interoperability

- A useful working definition of interoperability
 - The ability of two or more entities or components to exchange information and to use the information that has been exchanged *“to meet a defined mission or objective”*

Customer Problem Statement

- “I could run my business better if I could gain operational efficiencies improving
 - **the many different business processes of the enterprise**
 - both internal, and
 - spanning the key interactions with suppliers, customers, and partners using
 - **integrated information, and integrated access to that information.”**

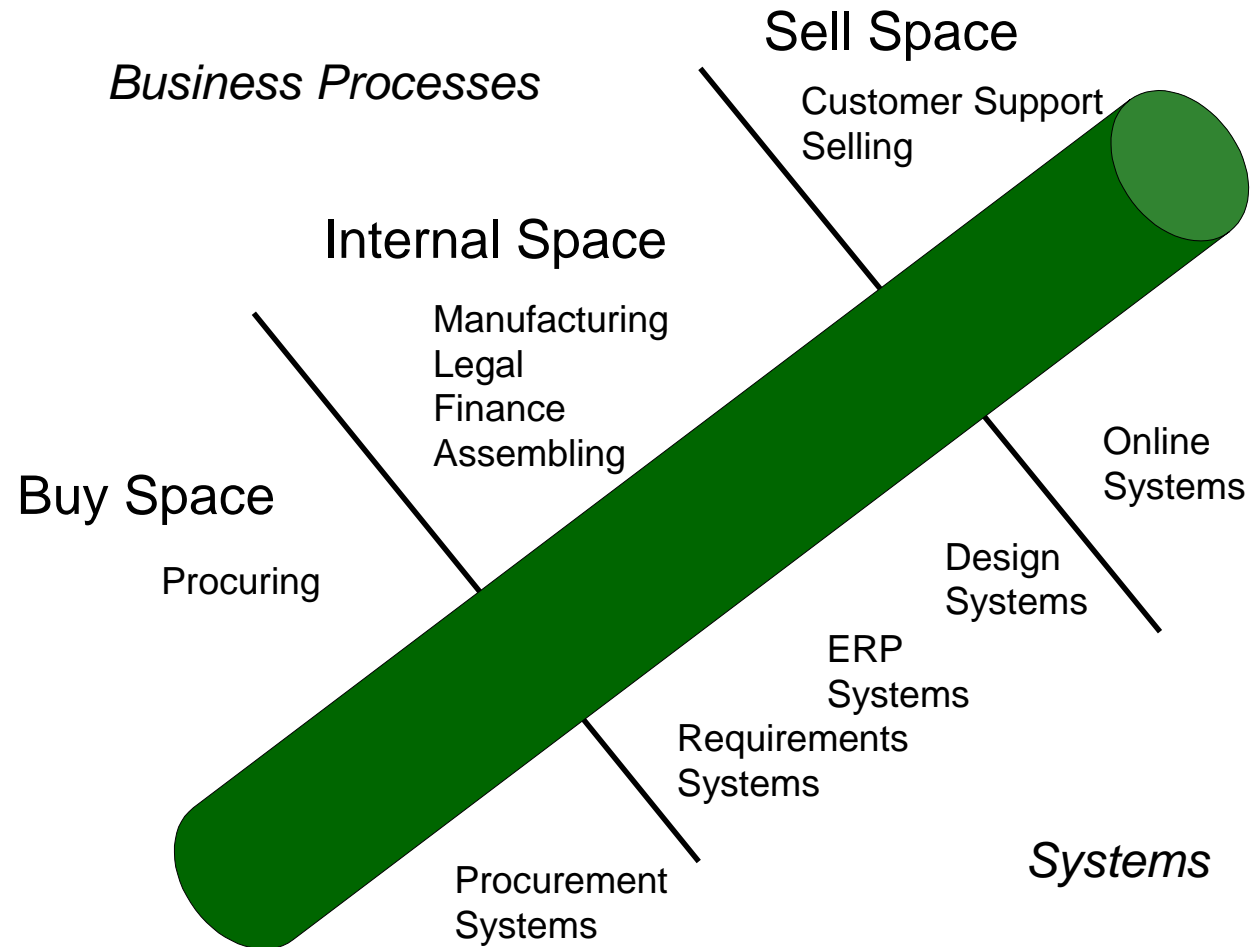

Shared Problems across Industries

Common problems

Problems from ...

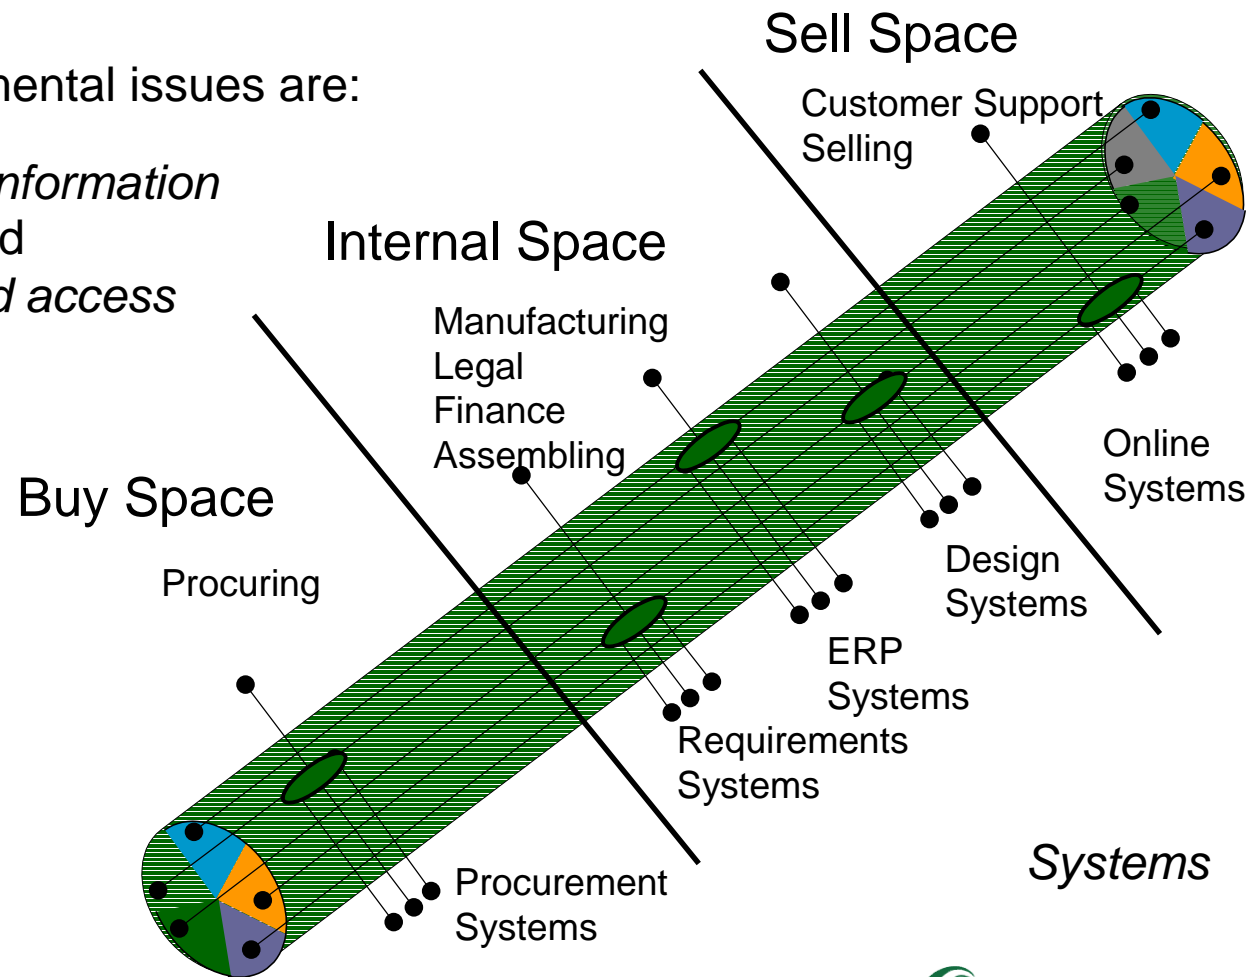

*Need to integrate
and optimize
business
processes*

Problems from ...

However fundamental issues are:

*Integrated information
and
Integrated access*

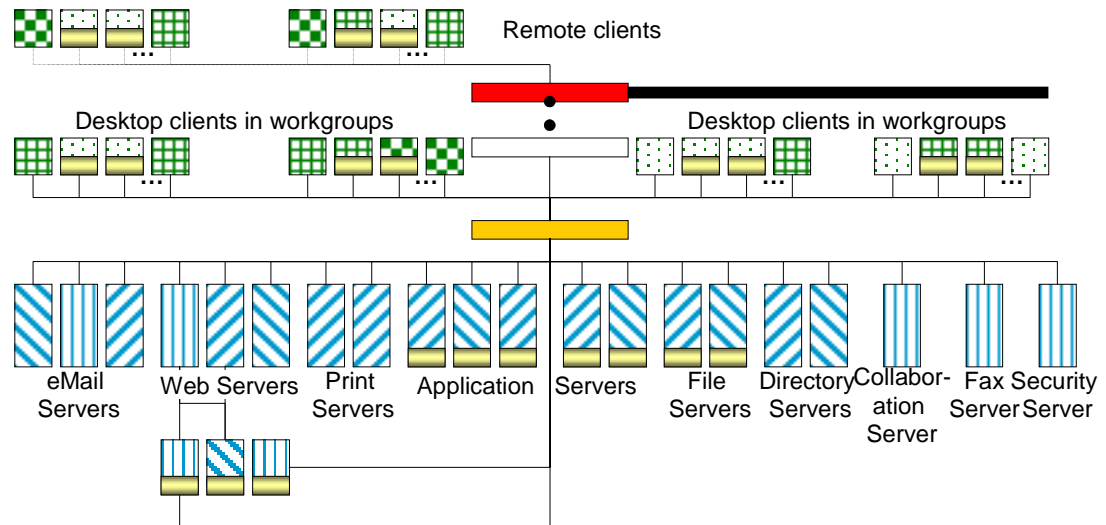

Technology Environment

Network View

- Highly complex
- Heterogeneous
- 1000s of systems
- Information throughout
- Need for some level of information sharing

- Too much information that just can't be easily accessed and managed!

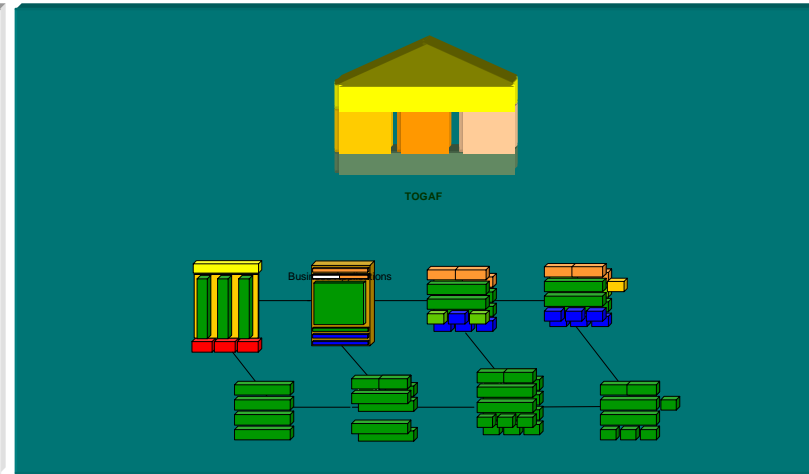

So What Can You Do In The Open Group?

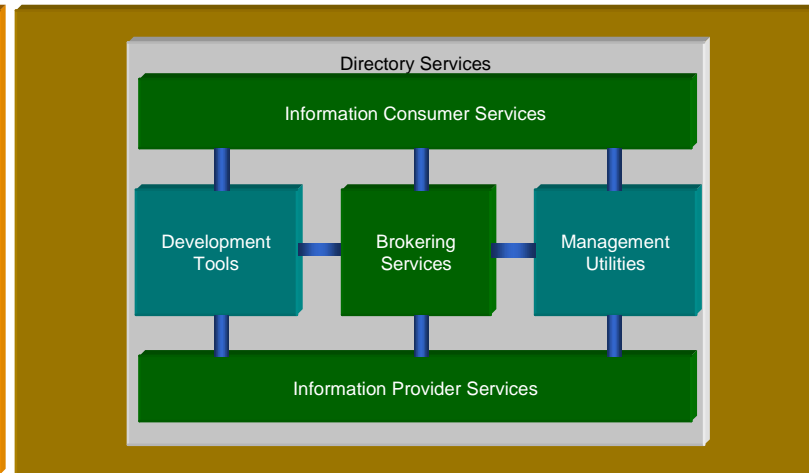

Information

Infrastructure

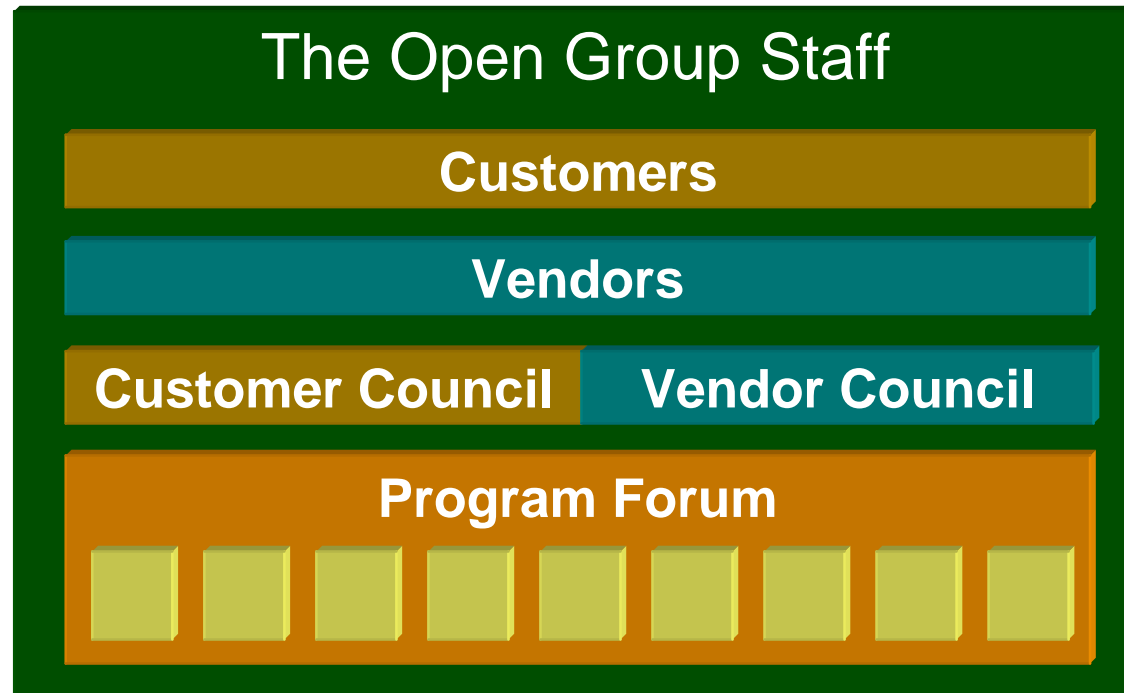

Business

Technical

We All Have Parts to Play

We can and will succeed!
Together we're better.

Topics

- ❑ What is **In³**
- ❑ What's new in certification
- ❑ The Single UNIX[®] Specification – The Authorized Guide
- ❑ Highlights from The Forums

DMTF

- ❑ DMTF has retained us to develop a certification program for the CIM specification
 - Certification Policy
 - Test Architecture
 - Program materials
 - Test suite
- ❑ For operation by DMTF or a 3rd party as required
- ❑ <http://www.dmtf.org>

LSB

- ❑ Retained by the Free Standards Group
- ❑ To develop a certification program for Linux based systems
- ❑ And applications that run upon them.
- ❑ Target is the Linux Standard Base specification (LSB), an application binary interface for Linux.
- ❑ <http://www.linuxbase.org>

SIF

- ❑ Membership from K-12 education suppliers and school systems
- ❑ Standards for data interchange between applications
- ❑ Retained to develop certification policy and test architecture
- ❑ Program development and test suite development under discussion
- ❑ <http://www.sifinfo.org>

DVB-MHP

What is DVB-MHP?

- ❑ MHP stands for Multimedia Home Platform
- ❑ A specification that is part of the Digital Video Broadcast (DVB) standards under development by the EBU
- ❑ EBU standards cover all aspects of digital broadcast for terrestrial, satellite, cable and leverage off other ISO and ETSI standards
- ❑ MHP Test Consortium (DVB-MHP TC) is funding us to develop a test suite
 - <http://www.mhp.org/>

MHP provides:

- ❑ Application delivery to a TV or iDTV
- ❑ Ability to work with plug-in or agent processes
 - Browser
 - JMF Player for video and audio
 - Image display
- ❑ An application sand-box for security

Applications:

- ❑ Enhanced TV Experience
- ❑ Customisable applications
 - Stock analysis
 - Sports information
 - News headlines
- ❑ Games and gambling
- ❑ On-line shopping
- ❑ Integrated broadcast and web

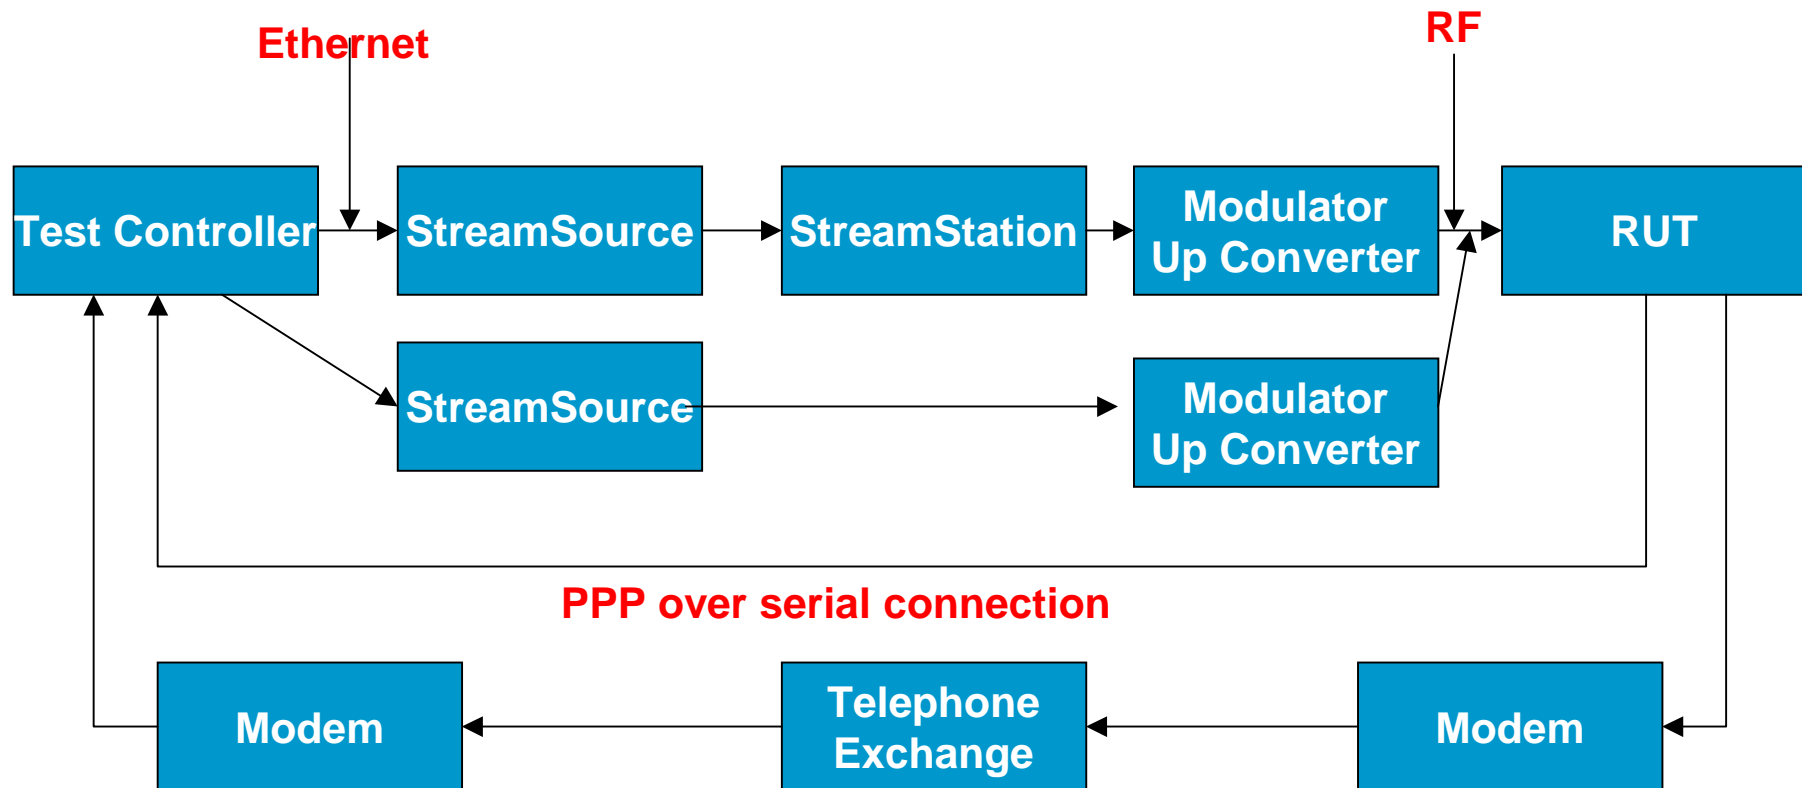

MHP includes

- ❑ Java & HTML APIs for applications
- ❑ Application control by the broadcaster or from other applications
- ❑ Secure access to scarce resources
 - Return channel
 - Conditional Access (Parental, Purchased)
 - File system
- ❑ “File system in the sky”
- ❑ Program synchronised events

How do we test MHP?

- ❑ Server - client model based on TETware
- ❑ Test controller installed in a rig with broadcast equipment to transmit to a receiver
- ❑ Tests are broadcast streams with audio, video, data and other assets
- ❑ Automated tests of the software environment in the Receiver Under Test (RUT)

Current Test Environment

Contents Summary

BOOK

- ❑ An overview of the history of the UNIX system and the Single UNIX Specification
- ❑ Guidance on how to use the Single UNIX Specification
- ❑ Detailed Interface tables
- ❑ Detailed migration information between version 2 and version 3
- ❑ C language migration information
- ❑ The Open Brand
- ❑ And more...

CDROM

- ❑ The Single UNIX Specification Versions 1, 2 and 3 in html and PDF
- ❑ IEEE Std 1003.1-2001 (POSIX®)
- ❑ PDF Browser software (Adobe Acroread and xpdf)
- ❑ The complete Motif, CDE and X11R5 specifications in PDF
- ❑ X11R6 Protocol specification, XNFS 3W, XNS v5.2, TPI v2, DLPI v2
- ❑ And more...
