THE Open GROUP

Active Loss Prevention Conference
Grand Hotel Krasnapolsky
2001
Amsterdam 22-26 October

THE CONFERENCE INCLUDES:

Active Loss Prevention
providing a framework for:
- Enhanced Trust and Confidence
- Effective Risk Management
- Secure Global eBusiness

Mobile Security
Bluetooth Security
Real-Time Safety Critical Systems

Active Loss Prevention

- Raises trust and confidence in the systems and networks upon which eBusiness relies.
- Involves use of standard components that are CERTIFIED, and design and construction methods that are CERTIFIED, to build secure eBusiness systems.
- Complete ALP conformant systems are CERTIFIED and maintained through periodic inspections to ensure that changes have not compromised the safety of the systems.
- A process that anticipates security and other threats and works to reduce associated risks.

ALP is a new approach to the management and quantification of risk:

- establishing best practice
- providing business and systems integrity
- building trust and confidence
- the basis for assessing liability and calculating insurance premiums for eBusiness systems.

Lawyers, auditors, and insurers need to work with the IT specialists to bring a viable solution.

Why attend

The Open Group's previous Conferences have explored Security and other Requirements for eBusiness and the theme of Trust and Confidence. It is clear that a more pro-active and methodical approach is essential to the future growth of eBusiness, and to building trust and confidence in these systems.

This Active Loss Prevention Conference is the first opportunity to explore and work on the subject. CIOs, IT specialists and legal, audit and insurance professionals can learn more, get engaged, and influence the result.

Can you afford to be elsewhere than our next Conference in Amsterdam?
Mark your diary for October 22/23 and register for the Conference now!

The Plenary and Workshops on Active Loss Prevention

Aims to create a business-oriented view of the requirements by involving the professional organizations such as auditors, insurers and lawyers in defining and solving eBusiness problems.

FOR FURTHER INFORMATION AND THE OPPORTUNITY TO REGISTER ONLINE GO TO: **www.opengroup.org/amsterdam2001**

Day 1 (Monday October 22) will examine existing best practice and some of the challenges raised in eBusiness in order to deliver immediate value to delegates. There will be presentations from leading vendors on the market realities they face, and from auditors, insurers and lawyers on risk and liability in eBusiness, plus some interesting views on trust modelling. Our speakers include:

- **Bill Hancock, SVP & Chief Security Officer, Exodus Communications Inc.,** on "The Widening Security Threat Envelope"
- **Bruce Schneier, Founder & CTO, Counterpane Internet Security Inc.,** on "Resilient Security"
- **Jacques Francoeur, CEO, Chief Trust Officer Inc.,** on "The Digital Train of Trust Methodology"
- **Ed Gerck, CEO, Safevote Inc.,** on "The Role of Trust in Internet Security"
- **Matthew Yeo, Steptoe & Johnson LLP.,** on "The Liability Issues"
- **Lisa Hansford-Smith, Marsh PLC.,** on "Insurance and eBusiness".

Day 2 (Tuesday October 23) of the Conference will lay out the work needed to address the priority tasks to enable all organizations to benefit from Active Loss Prevention in the future. Four consecutive workshops will cover trust issues, insurance in the eBusiness world, liability issues of eBusiness, and audit and risk management.

Mobile Security Workshop
TUESDAY 23RD OCTOBER 9.00-12.30

A half-day technical workshop considering the issues of:
- Securing mobile Internet access
- 3G, WAP and GSM security
- Wireless LAN security and VPNs

Bluetooth Security Workshop
WEDNESDAY 24TH OCTOBER 9.00-12.30

A half-day workshop giving a technical overview of the security/insecurity issues with Bluetooth, how they might impact a businesses decision to adopt the technology, and how Bluetooth standards and protocol developments might overcome future security problems.

Real-Time and Embedded Systems Forum Open Plenary
WEDNESDAY 24TH OCTOBER 9.00-5.00

A two day open workshop examining the issues of Safety, Safety Critical and Critical Infrastructure relating to real-time and embedded systems.
- What are SAFE embedded systems?
- Safety Critical software
- Using Real-Time Linux in Safety Critical Applications

Quality of Service Taskforce
WEDNESDAY 24TH AND THURSDAY 25TH OCTOBER

A two day open working session covering:
- The QoS Business Scenario
- Service Level Agreements and Policy
- Application Profiling Standards
- Current and Future Liaison Consortia Initiatives

Architecture Briefing
WEDNESDAY 24TH OCTOBER 9.00-12.30

A practical half-day briefing will update you on the current 'state of the art' in methods and tools for IT architecture.
- A briefing on The Open Group Architectural Framework
- Case studies on the use of TOGAF
- A briefing on a new standards information base in eBusiness

Networking Opportunities
The conference offers numerous opportunities for networking with business, government and defence professionals in the IT systems and infrastructure field. The conference dinner (FREE to all delegates) on the Wednesday evening will provide an informal and entertaining venue for networking with your peers. In addition there will be an invited speaker reception on Tuesday evening sponsored by Predictive Systems which will address the topic of "Security issues for Mobile Internet Users using Wireless LAN in aviation environments".

PREDICTIVE SYSTEMS

About The Open Group
Since 1985 The Open Group, a vendor and technology-neutral consortium, has been committed to delivering greater business efficiency by bringing together buyers and suppliers of information technology to lower the time, cost and risks associated with integrating new technology across the enterprise. The Open Group's mission is to offer all organizations concerned with open information infrastructures a forum where they can share knowledge, integrate open initiatives, and certify approved products and processes by providing an environment of trust and impartiality.
