

Issues and Assets

Discussion of the Challenge
Cannes QoS - RT Meeting

Other Scenarios

- ⌘ Akamai - "CNN on the web" is a customer, image distribution - requires temporal coherence - CNN broadcast is another application - Multiple feeds - include web postings. Includes considerations re digital rights management and authorization of payment for content (Charles to pursue)
- ⌘ Aegis cruiser (Dave L to pursue?)
- ⌘ Future Combat Systems - public description available (Dave L to send out the info)
- ⌘ Ad hoc 802 networking (Neil)
- ⌘ "Internet in the sky" - ARINC, Boeing - ??

Issues and Assets

⌘ What is the value proposition of the challenge:

⊞ for users

- ⊞ better definitions for your SLAs
- ⊞ mutually assured survival(MAS)
- ⊞ vendors working on YOUR problem on their \$\$
- ⊞ products you can buy that meet your needs
- ⊞ identification of the problem for you and your problem
- ⊞ public awareness of a problem (vendors and research)
- ⊞ possible personal victory - save Ada

⊞ for vendors

- ⊞ MAS, definitions of SLAs, understanding of issues by users
- ⊞ PR and being known - leading to SALES
- ⊞ opportunity for unusual synergies between vendors in different enclaves

Issues and Assets

⌘ What assets are available

- ☑ Joe Bergman's universities
- ☑ membership and those 2 degrees of separation from them
- ☑ OMG partnership
- ☑ remote possibility of gov't \$\$\$\$????????????
- ☑ DAPRA?

⌘ E-mail list for interested people
